

TPOに合わせて遊ぶ、 大人のためのファッション・グラス

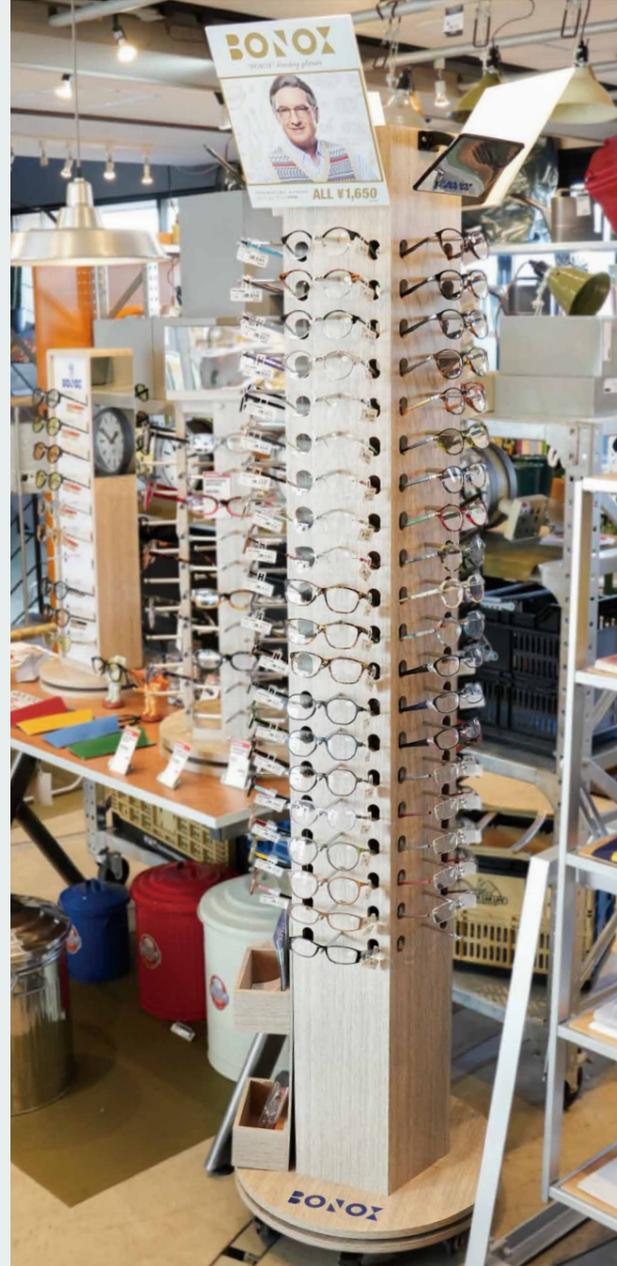

Reading glasses (リーディンググラス)とは、老眼鏡のこと。
欧米では薬局や本屋などの身近な場所で手軽に買える。
ファッションアイテムとして昔から親しまれてきました。
何本も所有してTPOに合わせて楽しめる、
豊富なデザインとお求めやすい価格。
いつもは選ばないようなデザインにチャレンジできるのも
リーディンググラスの楽しみのひとつです。

CHAPTER TWO
THE FALLING-STAR

THEN CAME THE night of the first falling-star. It was seen early in the morning rushing over Winchester eastward, a line of flame high in the atmosphere. Hundreds must have seen it, and taken it for an ordinary falling-star. Alton described it as leaving a greenish streak behind it that glowed for some seconds. Denning, our greatest authority on meteorites, stated that the height of its first appearance was about ninety or one hundred miles. It seemed to him that it fell to earth about one hundred miles east of him.

I was at home at that hour and writing in my study; and although my French windows face towards Ottershaw and the blind was up (for I loved in those days to look at the sky), I saw nothing of it. Yet this stranger of all things that ever came from outer space must have fallen while I was writing there. I only looked up as it passed. Some of those who say it travelled with a hissing sound. I myself heard nothing. Many people in Berkshire, Surrey, and Middlesex must have seen the falling-star. It is probable that another meteorite had descended. No one seems to have troubled to look for the fallen mass that night.

But very early in the morning poor Ogilvy, who had seen the shooting-star and who was persuaded that a meteorite lay somewhere on the common between Horsell, Ottershaw, and Woking, rose early with the idea of finding it. Find it he did, soon after dawn, and not far from the sandpits. An enormous hole had been made by the impact of the projectile, and the sand and gravel had been flung violently in every direction over the heath, forming heaps visible at a distance of a half way. The heather was on fire eastward, and a thin blue smoke rose against the dawn.

The Thing itself lay almost entirely buried in sand, amidst the scattered splinters of a fir tree it had shivered to fragments in its descent. The uncovered part had the appearance of a huge cylinder, caked over and its outline softened by a thick scaly dun-coloured incrustation. It had a diameter of about thirty yards. He approached the mass, surprised at the size and more so at the shape, since most meteorites are rounded more or less completely. It was, however, still so hot from its flight through the air as to forbid his near approach. A stirring noise within its cylinder he ascribed to the unequal cooling of its
